Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- The only independent claim 1 recites a fiber distribution hub enclosure comprising a fiber distribution hub enclosure, which is not clear and indefinite.
- Claims 2-11 recite the limitation "the fiber distribution hub" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by BuAbbud et al. (6278829).

BuAbbud (Figures 1-6) shows a fiber distribution hub enclosure 10 having a subscriber patch self 14, 16, 18 with a plurality of termination connectors 64 to form a termination field and a splitter self with a plurality of optical splitter modules 24, 26, 28 with a plurality of output pigtail ends with connectors 54A-54N located directly on a plurality of adapter receptacles on a splitter module bulkhead. The connectors 54A-54N are staged on adapter ports on the bulkhead. The optical splitter self is provided with a strain relief harness 32 with an adapter for providing pull strength and radius control for a ribbon cable 30. Forming of a plurality of individual jacketed pigtails for splitter ports, an adapter for storing a plurality of splitter output pigtail ends, configuring the adapter receptacles for receiving a connector ferrule tip and a hinge on the splitter module self are inherent as these are found on almost all optical fiber routing and support cabinets.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thompson et al. (6363200), Solheid et al. (6760531) and Clapp, Jr. et al. (6792191).
